

# [SCOPECHAT USER DOCUMENTATION]

and In App Layout

**Android Splash Screen**

**Iphone Splash Screen**

\*We urge all users of ScopeChat and the internet to be cautious of whom they trust and also to be extremely aware and careful of what they share directly or indirectly.\*

Brought to you by Adaptive Schemer LLC

ScopeChat is the local social where you can tell a secret to ONE or MANY and it is still considered a secret because no one knows who told the secret.

How about...

Have you ever wanted to know as soon as something happened if it was around you or in your geographical area? Or do you like finding out about it much later via News reports or next day's word of mouth?

Saw something that you just wanted to tell everyone in that area about but just didn't know how to reach them short of tapping everyone on the shoulder?

Or just wanted to Rant, say something, engage in conversation or witty banter, post a picture or video about your location without it following you in your cyber profile?

Better yet you have to tell someone about something that is supposed to be kept as a secret but you just want to explode about it?

Well...

You have found the place where you can do just that and nothing will come back to you. Yes we said nothing, seeing that it isn't a crime or totally illegal. We at [Adaptive Schemer LLC](#) know how difficult it is to vent without having anyone's eyebrow turn up at you, or to say something and then wonder if it is going to get back to someone that can determine your direct future. We are here to give you a platform where you do not have to worry about any of that.

[Adaptive Schemer LLC](#) has now brought you 'THE Local Social' where Anonymously, Secrets are shared and people talk freely and honestly.

Welcome to ***ScopeChat***<sup>™</sup> (THE Local Social)

## **features:**

Anonymous Message Posting

Geolocation Messaging

Picture post

Video Post (30 sec)

Attach Images to post

Reply / Comment to Post

NSFW filter and tagging

Message Notifications

Private messages and Private message box

Change Display Name / Handle

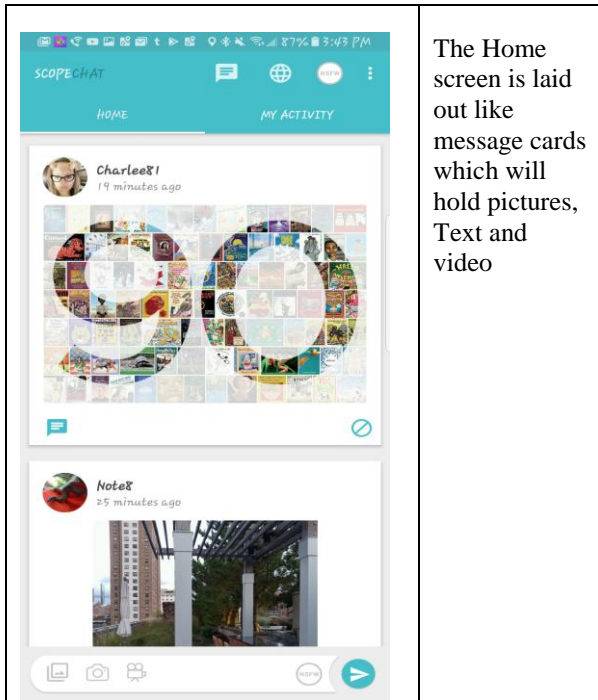

Change Avatar

Delete All Of Your messages (by changing the User Display Name)

Deletion of messages system wide in 9 days (which will be shortened to 72hrs)

Block Users and or Report ScopeChat Posts.

## Home Screen

The Home screen is laid out like message cards which will hold pictures, Text and video

The Home screen has three main filters;

**Home** - Everything in the user's radius that they set.

**My Activity** - This is everything that the user has posted in their current radius.

**NSFW** - Used to filter out posts that can be deemed as not appropriate for the work environment.

**Private Message indicator** - This notification / indicator shows you how many new unread messages you have.

**Private Message Box** - Can be accessed by pressing the private message notification/ icon in the menu bar. The private message box will have a list of all of your private messages. Private messages cannot be seen by anyone except the two users messaging back and forth.

**Map** - The map will give you a visual reference of how far you are receiving messages from, and how far others can see your messages that you post.

**NSFW** - the NSFW is located in two places for 2 different reasons.

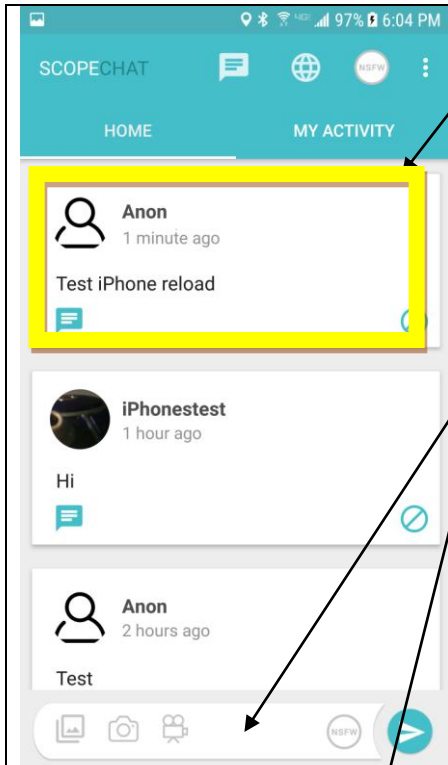

- 1.) In the top menu which is used as a message filter. When button is activated it will turn green. This will allow you to see NSFW posts that are within your area.
- 2.) In the message creation areas the NSFW is present as well. The function of the button in this area is to tag your post as NSFW. When this button is pressed it will turn green to show that it is activated.

**Settings** - Settings is where all of the user settings are held. The radius selection, User display Name, Avatar, and notification parameters.

### Home Screen Buttons

	Private message Box
	Map - Shows your radius on area map
	NSFW Button
	Settings Menu- Android and Iphone
	Comments
	Report / Block
	Camera message button
	Video message button
	Select from Photos message button
	Text message button Iphone

## **Posting A Message & Replying /Commenting (Text)**

Replying / commenting is triggered by pressing the post you want to reply or comment to.

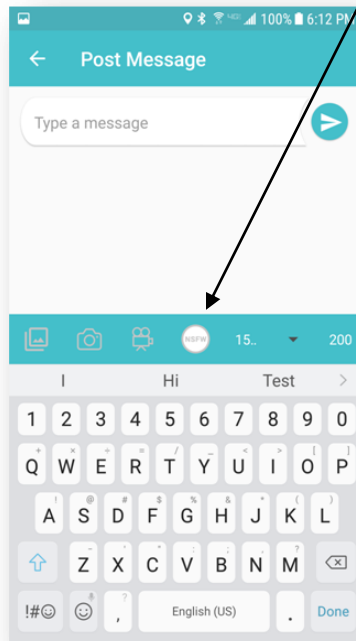

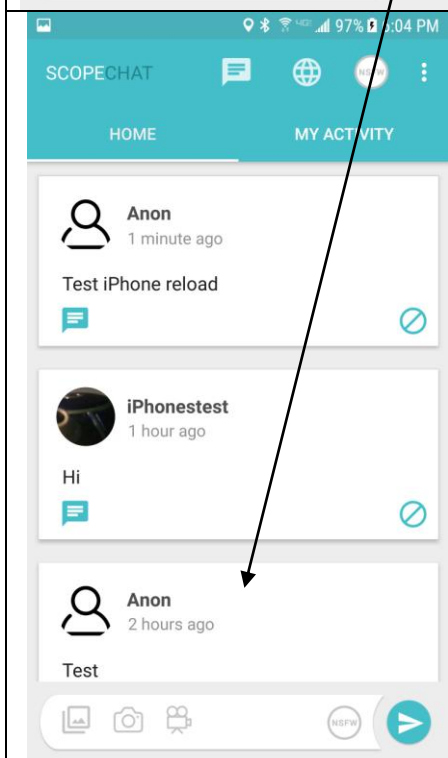

By pressing the message area on the home screen or anywhere else that option is available, the message creation area will open up and you can then start to compose your message.

Posting messages is very simple press the message creation area and start typing your message. ScopeChat doesn't allow more than 200 characters of text in any single message.

Emoji's can be sent also with your messages. Emoji's that are allowed are the ones that have come with your phone. We do not at this time supply a list a Emoji's for users to use.

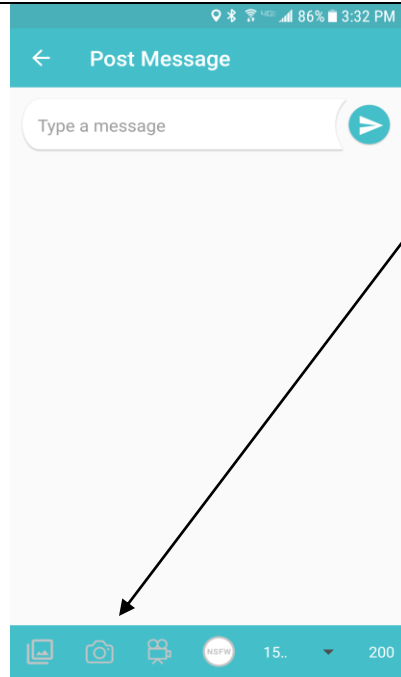

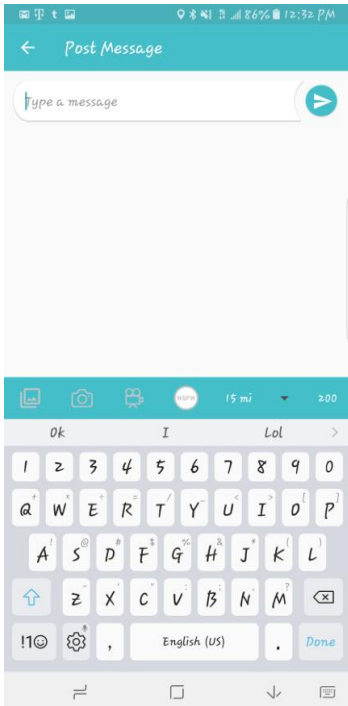

You can tag your message as NSFW by pressing the NSFW at anytime before you press send.

**You cannot un-send your message once you press send.**

All messages will get deleted in 9 days for now. In the future this deletion period will be dramatically shorten, messages will only be available for 72hrs.

## Posting A Message & Replying (w.Picture)

Posting messages with a live camera picture is the same as posting a text message as outlined above. Press

the camera button  the phones native camera application will open up and you can now take a picture.

Once the image is taken the page will show you an image preview with the two options ;

Retry –if you want to retake the image.

OK – which is, you are satisfied with the image and want to proceed.

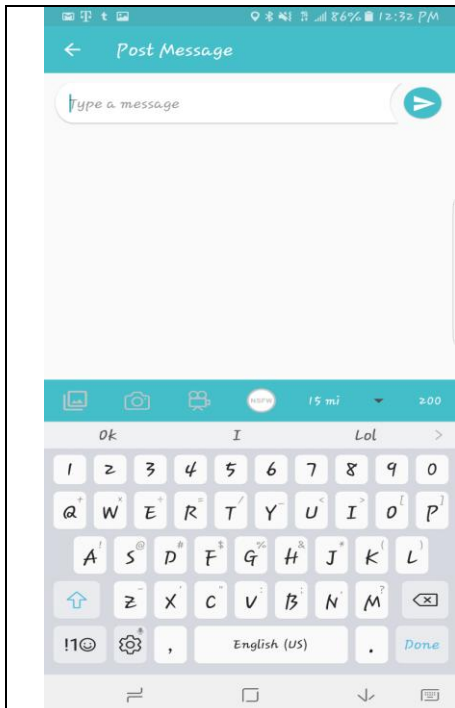

The user will be taken back to the scopechat message creation screen where the user will see a thumbnail which will show up under the text line.

If you decide that you do not want to send this message then inseted of pressing the send button press the back arrow (android) or cancel (Iphone) located in the upper left corner of the screen.

## **Posting A Message & Replying (Video)**

Posting A Video from your camera is accomplished by pressing the Video Camera

button  in the message creation area. Once the video button is pressed the phones native Video recording application will open up and a message will pop up which tells you That your video length is upto 30sec.

Once the video is taken the page will show you a preview with three options ;

Play Button  - to play the video that was just taken so that the user can preview the video that was just taken.

Retry –if you want to retake the video.

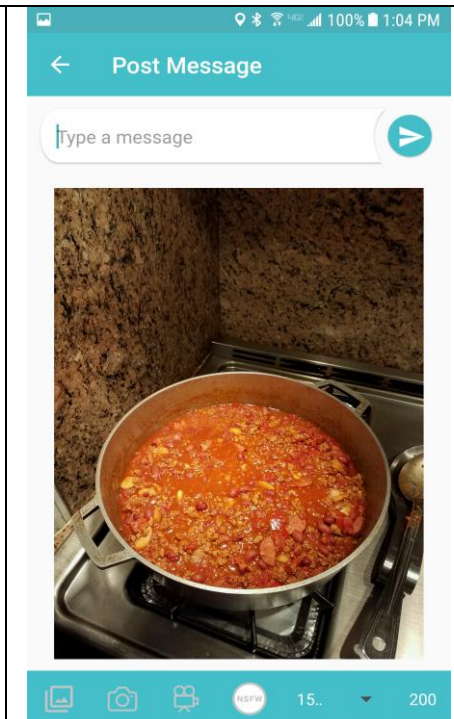

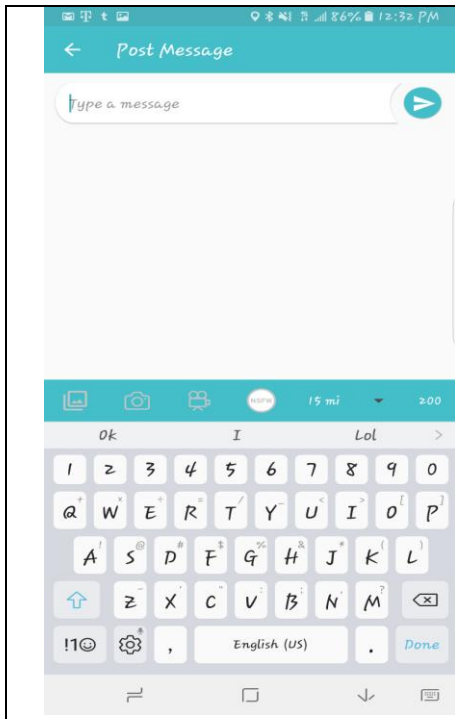

OK – which is if you are satisfied with the image and want to proceed

Once video is taken the thumbnail will show up under your text line.

A play button will appear under the video thumbnail. Which allows you to play the video again.

## Posting A Message & Replying (Attaching A Picture)

Attaching a picture to a message the user has to press the attach

button  inside the message creation screen.

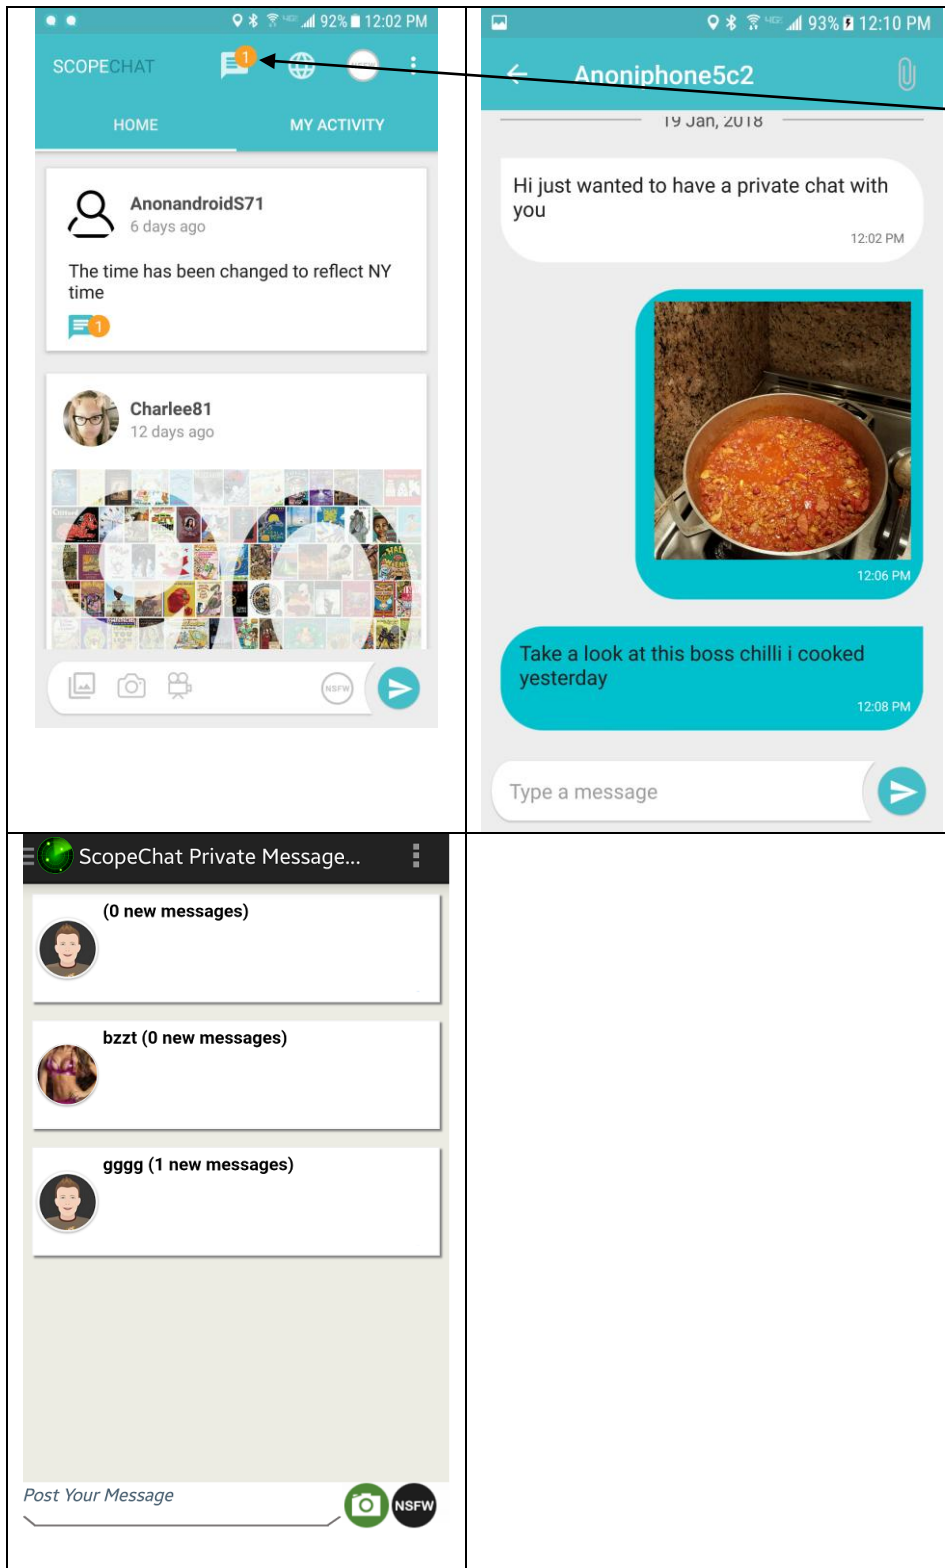

When the user presses the attach button the phones file manager will open up and any of the photos that are stored on the phone will be available for you to attach with your message.

Once a picture is selected the user will be takenback to the message creation area where they will be able to see their picture thumbnail.

## *Private Message Box and Private Messages*

On the home screen the private message indicator will show you how many unread private messages that user has.

The private Message Box shows you all the private conversations that you have going on. The conversations in the user's private message box will be there until the user changes there display name or if the user deletes them by long pressing the message.

In the private message box each private conversation that is new will be denoted in the header of the conversation line next to the user's Avatar.

Private messages are only seen by the two users that are messaging each other.

Within the private message users can post video, pictures, text and attach images the same way they post regular messages throughout ScopeChat.

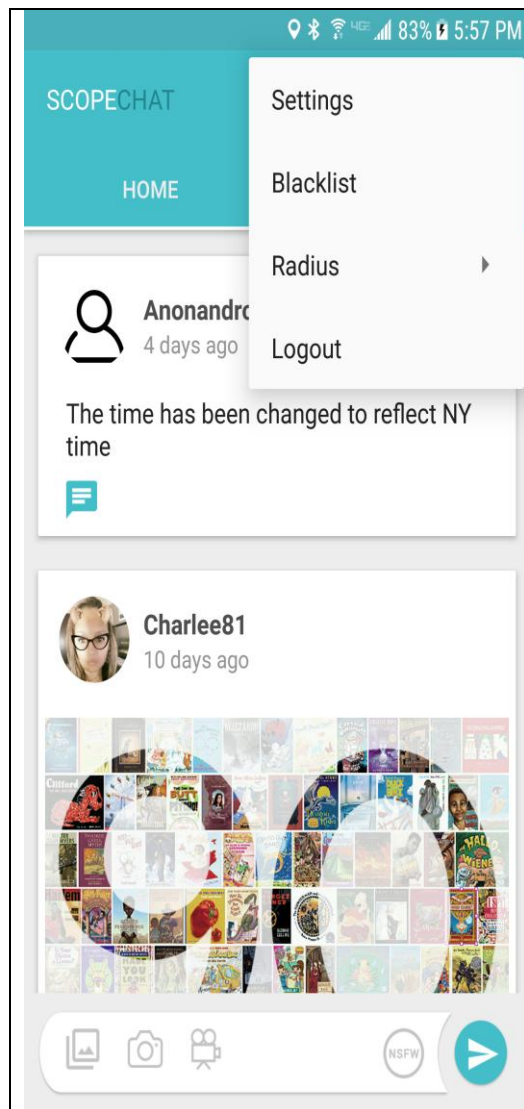

## Map View

The map view is where any user can see how far the messages they are receiving are from. It is just an informative tool so that you can see the reach of your messages in direct relation to your current location.

The green circle shows the radius in which messages are being delivered to you and when you post a message this is the distance that it will be delivered.

# Settings

By Clicking the menu buttons on the home screen in the top right corner (three dots) the user will have access to four options.

**Settings-** Where the user can change their avatar, display name, or change their app notification preferences.

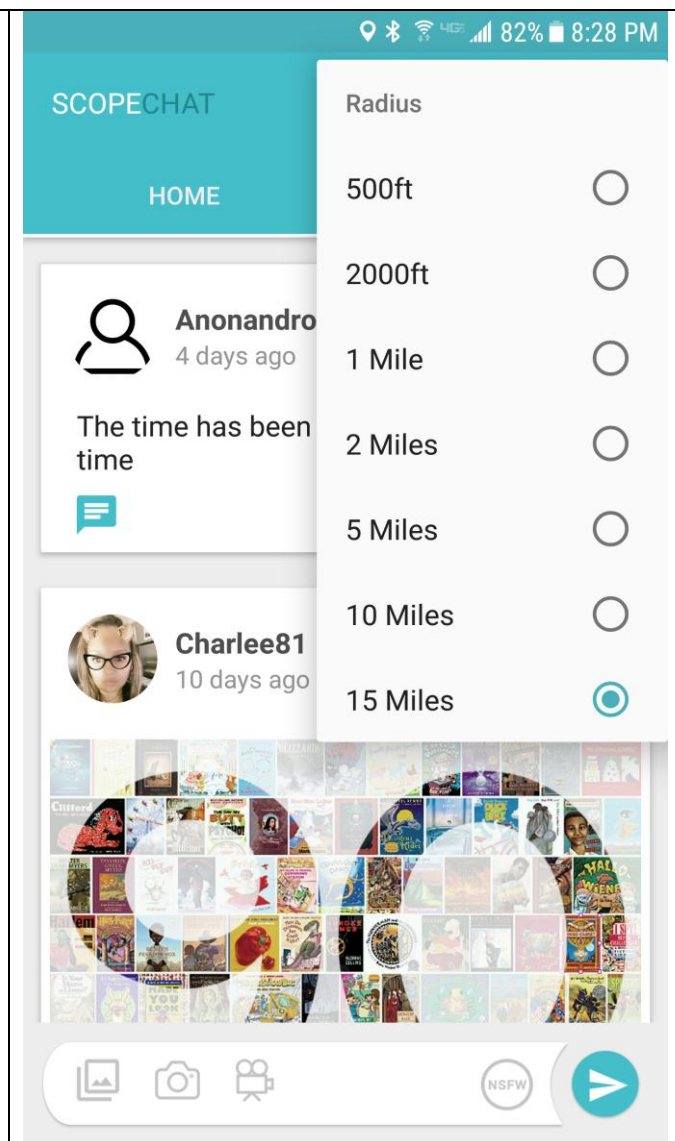

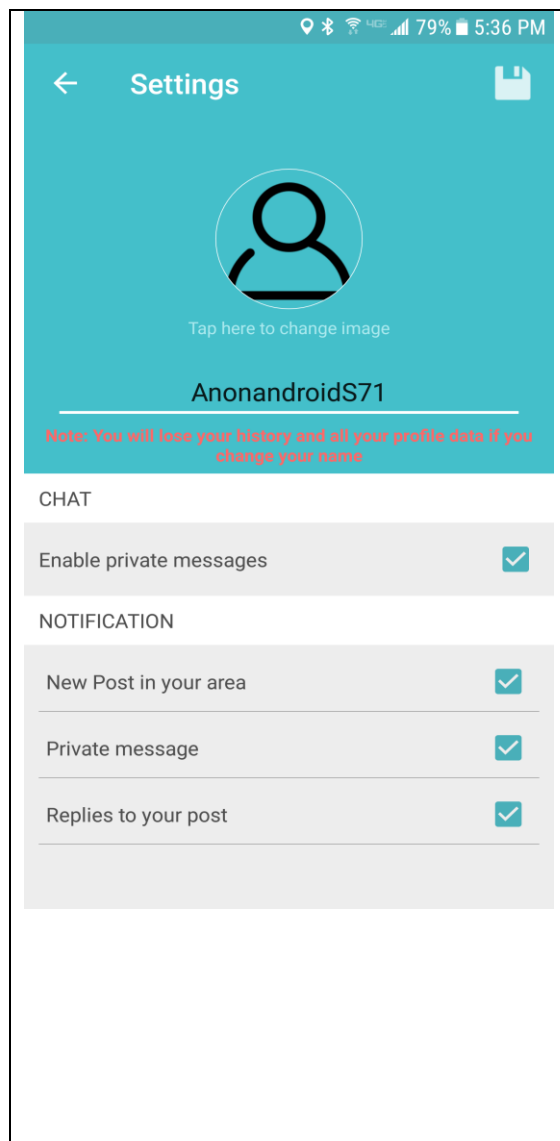

**Blacklist -** Displays the users you have blocked

**Radius –** This can filter out the distance that you can see messages from which are 500ft, 2000ft, 1mile, 2miles, 5miles, 10miles and 15miles.

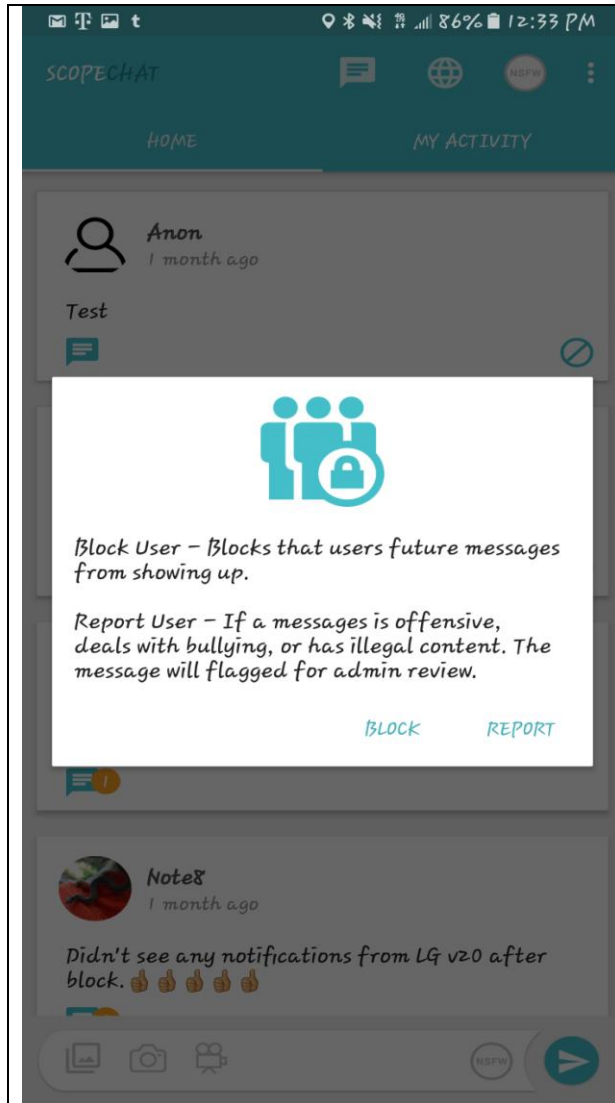

**Logout -**will initiate a pop-up

which will ask if you are sure. Press yes to exit the application. Press no to keep using ScopeChat You will be redirected to the home screen.

# *Blocking Users and reporting Users*

The option of blocking users and reporting users is solely user driven. The blocking of a user cannot be undone by a user.

Blocking a user is like turning a blind eye to all of that user's posts, even while you are in the same radius as that user. This task is accomplished by pressing the “Block This User” button  on the message screen sent by that user

Report This ScopeChat – reports that user and the message content to the admin for review. This could result in a warning, deletion of message, or blocking of user from using the app.

The definitions are laid out within the dialogue box also for easy referencing.

# *NSFW Messages & Filters*

 <p>The screenshot shows the SCOPECHAT app interface. At the top, there's a teal header with 'SCOPECHAT' and navigation icons. Below it, 'HOME' and 'MY ACTIVITY' tabs are visible. The main content area shows three message cards from users 'AnonandroidS71' and 'Charlee81'. A yellow box highlights a blue 'NSFW' icon on the first message card. A yellow arrow points from the top right 'NSFW' button to the text on the right.</p>	<p>If the NSFW filter on the home screen is activated you will see the NSFW button glow Blue.</p> <p>When the NSFW button is blue you <b>WILL</b> see NSFW posts and comments. Remember Blue equals NSFW and all messages are visible.</p> <p>When the NSFW button is white you will not see the NSFW messages but all other messages will be visible.</p> <p>You will know if a post is NSFW because you see a Blue NSFW icon attached to the post.</p>
